## SUMMARY

---

Test Automation Engineer with expertise in Selenium and API testing, delivering enhanced regression test suites that increase release confidence and reliability. Demonstrated problem-solving abilities and a collaborative mindset that promote effective cross-functional teamwork, ensuring timely project completion and high-quality outcomes in Agile settings. Proven track record of meeting organizational needs through consistent and organized practices, thriving under pressure and adapting to new challenges.

## EXPERIENCE

---

**Comcast, SDET-3** 01/2024 – Present | chennai

- Maintained and enhanced end-to-end regression suites for web and API platforms using Selenium, Java, and Postman, boosting test coverage and release confidence. Actively contributed to Agile teams, improved CI/CD integration, and ensured smooth deployments through structured testing, defect triage, and cross-functional collaboration.

**Cognizant Technology Solutions,** 06/2018 – 12/2023 | Chennai  
*Test Automation Engineer- Associate*

- Executed detailed manual test cases across end-to-end workflows, ensuring high-quality, bug-free releases in fast-paced Agile environments.
- Collaborated closely with developers and product teams to catch issues early, improve test coverage, and support smooth delivery cycles.

## CERTIFICATES

---

**SAFe Practitioner (SP)**  
certificatio

**ISTQB Certified Tester Foundation Level (CTFL)**

## SKILLS

---

IntelliJ Eclipse, TestNG, Browser stack, GitHub cucumberBDD, Selenium, Toad by Oracle SQL, Postman, JENKINS, API, GIT, Rally, JIRA, JAVA

## EDUCATION

---

**SRM College, MBA (Human Resources and Marketing)** 2024 | Chennai, India

**Satyabhama university,** 2017 | Chennai, India  
*B.com (computer science with commerce)*

## AWARDS & HONORS

---

**Pillar of the month.,** *cognizant*

01/11/2018

**Best Emerging Player,** *Cognizant*  
Extra Miler.

**Best Emerging Player.**

- Always striving, never settling and received gradel rating twice.

## PROJECT

---

**Telecommunications-Sky,** *Comcast*

01/2024 – Present

- Maintenance and enhancement of end-to-end regression test suites for Sky's web and API platforms, improving test coverage and release confidence.
- Developed and maintained frontend automation scripts using Selenium WebDriver with Java to support continuous delivery.
- Performed API testing using Postman to validate backend services and ensure seamless integration with frontend components.
- Provided daily test status updates and participated actively in Agile ceremonies including stand-ups and sprint planning.
- Delivered daily test progress updates and actively engaged in Agile ceremonies, fostering strong collaboration across cross-functional teams.
- Automated regression test workflows by enhancing Selenium-based suites and integrating API validation processes, driving higher release reliability and seamless platform integration.
- Actively participated in 3 Amigo calls (Dev, QA, BA) to ensure clear communication and requirement alignment.
- Led Agile ceremonies, including daily stand-ups, retrospectives, sprint planning, and feature refinements.

**Insurance - Hartford,** *Cognizant*

06/2019 – 12/2024

- Played a key role in delivering high-quality releases by performing end-to-end testing of a web based applications.
- Designed, developed, and maintained automated regression scripts using Selenium and Java,
- Used Selenium WebDriver for cross-browser automation of critical user journeys, helping reduce manual effort by 0%+
- Collaborated with developers, BAs, and product owners in Agile sprints, participating in daily standups, sprint planning, and retrospectives.
- Performed manual functional, regression, smoke, and UAT testing, ensuring test coverage against business requirements.
- Logged, tracked, and retested defects using JIRA, ensuring timely resolution and minimal production defects.
- Conducted API testing with Postman, validating response formats, status codes, and integrating backend testing with UI flows.
- Wrote and executed complex SQL queries for data validation and backend testing across multiple environments.
- Contributed to test planning, execution, and reporting, including test case creation, traceability matrices, and test summary reports.
